Live Independently with support

Home Care Direct makes it easy for people with complex health, autism and difficulties with behaviour to live independently.

Home Care Direct will provide a personalised support which is right for each individual person.

We can also provide the highest quality positive support for people who have difficulty with behaviour.

Home Care Direct works with other health and care organisations to meet the needs of people with Direct Payments or a Personal Health Budget.

We help people to live with their health condition or disability at home in their local community.

We help people to have control over their own support at home.
Our services

Home Care Direct provide these services:

- You will have the chance to choose where to live

- Your carers are trained to support you how you want

- We will focus our support around what you want. We will work to improve things for you

- We will work to improve your health and wellbeing

- You will be treated as an equal to the other people who live or work in your home
• We will help you to have more control over your life and what you do

• We will involve your family in your care and support if you want

• We will work with others when things become difficult

• We will help you if you need to move on and live somewhere else

• We will help you to live independently on your own or sharing with other people
